- A Standalone Application developed for “Sahana Medical Center” a medical center located in Wattala.

- Developed using the knowledge of Java and MySQL along with latest trending technological tools.

  Tools and Technologies used ： Java, JavaFX, MySQL.

  ***Source Code →***

  =====System Overview=====
- The system is able to diagnose patients which is done by the doctor which records patient’s past and present issues with prescribed medicines list after patient’s checkup. A Phamacy is also available so that patients can purchase medicine by their prescription given after the checkup. System is also able to record doctor’s attendance daily and generate reports on them, manage patients, manage doctors and manage medicines.

- A Standalone Application developed for an Wholesale grocery shop.

- Developed using the knowledge of Java and MySQL along with latest trending technological tools..

Tools and Technologies used ： Java, JavaFX, MySQL, Jasper Reports

***Source Code →***

=====System Overview=====

- The system is able to place customer orders, manage customer orders, manage items (CRUD Operations) and generate reports on most movable item, least movable item and total income statistics filtered by date.

- A Standalone Application developed for "The D24" a prominent student hostel located in Colombo.

- Developed using the knowledge of Java, MySQL and Hibernate framework along with latest trending technological tools.

Tools and Technologies used ： Java, JavaFX, MySQL, Hibernate

***Source Code →***

=====System Overview=====

- The system is able to make reservations for rooms and if the student is new he/she can be added, update reservation's paid status, manage students, manage rooms, edit user credentials, view the list of students who haven't paid key money yet and the details of the student's who reserved the specified room.

- A Standalone Application developed for an Automobile Workshop which was completed as my 1st Semester Final Project (ITS 1066 - Professional Software Project in IT).

- Developed using the knowledge of Java and MySQL along with latest trending technological tools.

Tools and Technologies used ： Java, JavaFX, MySQL, Jasper Reports

***Source Code →***

=====System Overview=====

- As the business overview / nature of the business is a customer being able to Service, Repair or Wash their vehicles,
  the system user is able to add vehicles to Service, Repair or Wash and they can be managed for any edits as an administrator privilege.
  In addition, the administrator is able to generate reports on each vehicle work done, manage employees,
  record employee attendance daily and generate reports on them as well.
